Nevada City Nugget

VOL. VI, NO. 32 | The GOLD Center | NEVADA CITY, CALIFORNIA | The County Seat Paper | FRIDAY, JUNE 17, 1932

ASSESSMENT MORATORIUM BILL EXPLAINED

Only miners who have failed to do their assessment in the current fiscal year, ending June 330, 1932, will benefit under the provisions of Joint Resolution 341, recently signed by the president, according to a dispatch to the Sacramento Bee.

Only those who have already done the required $100 worth of labor on their claims, or have made improvements to that extent, gain in any way through the passing of the resolution.

Another question which has come up in regard to this matter is whether those who have done work amounting to $100 on their claims in the current year will be given credit next year. In the opinion of the bureau of public lands, under which this comes, there is na chance under the resolution that this can be done.

The resolution itself is very brief, saying:

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the provision of section 2324 of the Revised Statutes of the United States which requires on each mining claim located, and until a patent has been issued therefor, not less than $100 worth of labor to be performed, or improvements aggregating such amount to be made each year, be, and the same is hereby suspended as to all mining claims in the United States, including Alaska, during the fiscal year from July 1, 1931, to July 1, 1932."

It was stated at the land bureau that no regulations in regard to the resolution would be issued and that the language of the act was so clear that it would not be necessary to file affidavits in regard to claims for exemption under the act. It was said, however, that purely as a precautionary measure, it might be wise to file some such paper with the local offices.

The resolution was not apprroved by the department of the interior, this, it is understood, being on the ground that all those who were financially able to do their work should do so in the interest of the unemployment situation.

In a similar manner congress delayed the passage of the resolution until less than three weeks before the expiration of the fiscal year, so that companies or individuals who were able to do their assessment work would do so, and the relief would only go to those so hard hit by the depression that they were unable to handle even the $100 burden.

It is stated that similar measures have been proposed in Canada several times, but always beaten, as in that country literall ythousands of prospects depend on the money they earn in doing such work for others for the "grub stake" on which they hope to make a fortune for themselves.

NEVADA COUNTY PICNIC DRAWS 6,000 PERSONS

It is estimated that there were fully 6,000 people attending the annual Nevada county picnic at the state fair grounds at Sacramento last Sunday. William Wicks is president of the Sacramento Nevada County Association.

The crowd brought their own lunches and a program of old-style Cornish wrestling event, and a speaking program were enjoyed. Judge George L. Jones of Nevada City delivered the principal address.

Melvin Hallett of Nevada City was the winner in the wrestling competition, defeating Earl Jones of Grass Valley. Hallett received the $25 and a trophy presented by Secretary of State Frank C. Jordan. Jones. took a $25 purse and a trophy offered by Superior Judge Martin I. Welch of Sacramento. Tommy Osborn took the third prize of $10.

Other speakers at the meeting were C. E. Clinch, Henry Argall, Fred M. Miller of Grass Valley and John O'Neill of Nevada City.

RANDSBURG GOLD MINES LTD., INCORPORATES AT $1 A SHARE

Randsburg Gold Mines, Ltd.,, mining, principal place of business, Los Angeles, incorporated for $300,000 with 300,000 shares, par value $1 each, by George A. Snow, Walter Moody, James R. Moody, Russell B. Snow, and H. F. Bowers, all of Los Angels.e

BIG "WEEKLY PAYROLL" CAMPAIGN ANNOUNCED

SMALL FORTUNE CAN BE MADE BY AGGRESSIVE AND ENERGETIC MEN AND WOMEN OF THIS SECTION DURING NEXT FEW WEEKS

CHOICE OF NEW PLYMOUTH SEDAN, TROPICAL CRUISE DE LUXE OR CASH AWARD HEADS LIST OF GRAND AWARDS

Wonderful Trip to Los Angeles and the Olympic Games, or a Cash Equivalent Will Be Awarded to the Second Prize Winner

We are out for 1000 new readers for the Nugget!

With this in mind, we today announce a mammoth subscription campaign, using the nationally known "Weekly Payroll" plan, whereby every one who assists us in fullfilling our aim, will receive a weekly pay check, and the one who does the best work will receive the choice of a new Plymouth Sedan, or a wonderful tropical cruise, or a fine cash equivalent. Then there are other prizes for the other active participants, amounting in all to hundreds of dollars.

It should be distinctly understood that this "Weekly Payroll" drive is just exactly what the name implies—a test of salesmanship ability, and everyone who enters and remains active for just 6 1-2 weeks will be highly paid for his or her efforts. There will be no losers—everybody wins—every participant will receive a nice pay check every Saturday night.

Credits will be given for every subscription secured. To the person who has the greatest number to his or her credit at the end of the campaign, will be awarded one of the late 1932 Plymouth Sedans. The very latest thing in the automotive world, or if that person prefers, he or she, may take instead a wonderful cruise through the Southern American countries, via the Panama Canal and up the East coast to New York and back to Nevada City by rail. However, should the one winning this grand trip desire, a cash equivalent of this trip will be awarded.

The person having the second highest number of votes will be awarded a wonderful vacation trip to Los Angeles and Hollywood and to the 1932 Olympic Games this summer, or if desired a cash equivalent of this trip will be awarded. Extra cash bonuses will be paid to all others who remain active according to the number of votes they have accumulated by the end of the campaign.

In promoting this interesting campaign, The Nugget asks the support of its family of readers and good friends. Those who are in arrears are kindly asked to bring their subscriptions up to date and pay in advance, and thus help their favorite candidate in securing votes as well as in earning the weekly pay checks.

And the subscribers (new or old) who pay up their subscriptions, will receive from his or her favorite candidate, a receipt for the paper, and the exact date of expiration will be sent out from the Nugget office at the end of the campaign. The candidate upon reporting the subscription to the Nugget office will be given vote credits according to the term of subscription paid. During the first period of this drive all NEW subscriptions bring DOUBLE votes to the workers.

Each week the standings of the participants will be published according to the votes accepted for publication. This will show everyone how the race is progressing.

Cash Prizes Will Be Given At Close of Each Period

In addition to the big prizes and the cash commissions, there will be GOLD awards (three in number) distributed to the best workers, at the close of each of the first and second periods of this drive. Here is more spending money for you.

CHEROKEE GOLD DRIFT MINE BEING REOPENED

The once-famous hydraulic gold mine, situated in Butte County, and which mine using the latest and most improved methods in the science of hydraulic mining, and had continuously produced the major production of gold recovered in Butte County until such date as the excessive banks composed of Basalt lava and massive pipe clay startas deflected the dividends of that great organization and the mine was closed.

The property was taken over by what is known as the Cherokee Gold Drift Gravel Company, who have spent more than one year in their attempt to determine the prospective value of the great channel or beach gravel deposit underlying the lava-capped mountain known as the Table mountain, embracing a gravel deposit approximately one and three-fourths miles in length and 1,200 feet in width, same deposit consisting of two distinct and separate gravel deposits, known as the Rotten Boulder gravel, and Blue Gravel channel, the former capping the blue gravel deposit, and the latter the bedrock or deeper channel bed.

The results of the demonstrations made by the new owners demanded a policy of attracting the gravel bed of the Table Mountain and preparing to that end on a very extensive program of extraction of gravel tonnage, and reduction process of the greatest modern methods.

The plan of the new company will find a great area of the gravel deposit blocked and drained of surplus water accompanying the formations permitting the overhead sands to dry and pack, making possible the gravel extraction at a minimum cost, and unlimited daily quantities. These gravels will be transported from the point of recovery by means of an overhead conveyor system, through a tunnel approximately 3,000 feet to a reduction plant composed of two rock breakers regulating the gravel sized, passing to five paddle mills, which reduced the gravels to a finer sand, then on to a system of concentration, where the finest gold particles which are free, as well as the pirites are saved and refined.

The plant will be operated by an electrical system furnished by the P. G. & E. and is assured sufficient power for all purposes, and is scheduled to be completed in the summer months.

The development of this mammoth enterprise assures a new era for that district, as assisting in the attempt to secure new money to relieve the present stringencies.

The property is under the management of Fred Dunn, a nationally known mining engineer and geologist, who has spent many months in making an analysis of the situation previous to recommending the purchase and installation.

MINERAL DEPOSITS IN SAN JACINTO QUADRANGLE

Supplementing Fraser's paper, "Geology of San Jacinto Quadrangle," which appeared in "Mining in California" for October, 1931, R. T. Sampson, mining engineer, presents a paper on the economic mineral deposits of this same region, and shows the relationship of geology to mineral deposits of commercial importance. The report is accompanied by a map.

NORTH STAR MINE MAKES BIG STRIKE

Last Saturday a report was made that an important strike of gold bearing ore had been opened up in a winze below the 9,000-foot level in the North Star workings. According to information available a five-foot shoot of rock carrying the good values was intercepted.

The company has sunk another 300 feet and ore was so promising that they have continued another 100 feet. It was in the 400-foot level that they run across this five-foot shoot of ore carrying good gold values. The company has been drifting on the 9,,300 level.
been made.

This strike is considered of unusual importance on account of the unusual depth.

This mine has been in operation over 80 years and is thought to be the deepest gold mine in the United States.

Arthur D. Foote, engineer and superintendent of the North Star for many years, sunk the central shaft from which it is estmiated $35,000,000 was taken out.

The North Star mine is a part of the the Empire-Star Mines, Ltd., consolidation, that company being a subsidiary of the Vermont Mining Corporation of New York.

The new discovery is in the southerly area of the property and in virgin territory.

OROVILLE MINES ARE SHOWING MUCH ACTIVITY

Ed. West of Oroville is completing a drag line system to mine the river bar adjacent to the city of Oroville.

A power line is being installed to operate the necessary machinery which is reported to be in active operation in three weeks.

This particular bar is presumed to be virgin ground, the prospecting which Mr. West has completed assures this opinion.

The ground will be elevated to a position which will assure the channel of the river bed from debris obstructions, the gravel will be washed at elevated positions and emponded in low lands developed by past dredger mining. The river has a large yardage of gravel, assuring the investment of a few years' dividends if successfully terminating.

Specimens of heavy sulphide ore are being exhibited in Oroville from the Gordon Hill mining district.

A vein of large dimensions has been uncovered showing an assay value of $13.00 as reported, and can be traced for a great distance. The property can be developed from the canyon of the West Branch of the North Fork of Feather River, allowing a deep backing for gravity mining or tunnel system.

The Gordon Hill mining district has shown lode values for 70 years. Surface workings uncovered very high grade ore in the past and is reasonably presumed that deeper development will uncover permanent deposits of gold ores.

The thorough prospecting of a tract of land owned by the Realty Company, citrus land owners of Oroville, is now under headway to determine the values of these lands for mining purposes under the drag line system of operating. The property is under option to Horas Onyett of Oroville.

The values as reported are most flattering, and the drag line system will be immediately installed as reported by Onyett.

Profitable mining of this land will open a field covering a vast acreage for gold exploitation. The land has a depth of 18 feet. Options on large gravel fields subject to drag line mining have been secured by Alex E. Wilson of Oroville, who will prospect these holding for gold values.

MR. AND MRS. FOOTE GO EAST TO RESIDE

Mr. and Mrs. Arthur D. Foote, after 35 years' residence in Grass Valley, have departed for New York, where they will spend the remainder of their days among relatives. To Mr. Foote, mine engineer and superintendent of the North Star mine for years, goes much of the success of that property. Mrs. Foote has written several books during her stay in Grass Valley. Their decision to return to their old home to reside has caused widespread regret among their many friends.

Hoover and Curtis Are Renominated by Republicans

The Republican National Convention at Chicago on Thursday afternoon re-nominated President Herbert Hoover and Vice-president Curtis as their candidates in the election in November.

BANNER MINE IS NOW BEING REOPENED

One of the pioneer quartz gold mines of Butte County, Calif., is rapidly being rehabilitated, and developments look promising for the future success of this property.

This property, one of the earliest manifestations of gold bearing lodes in Butte County, has a bullion production of two and one-half million dollars, dating from the first discovery by Smith and Sparks, local pioneer miners in the early '50s, to the present time.

The property has been idle for some years, excepting a development on a small scale by the owners, William Livesly and C. B. Lastreto. Los Angeles capital has taken the property over and installation of 10 stamps of 1,000 pounds capacity will be completed in three weeks. A new power line is to be installed, which will insure sufficient power for all mining demands.

The holdings consist of 280 acres, embracing four veins of gold ores, viz., the Banner, South Banner, Amosky and Clark and Coffee. The Amoskey is at present the source of attrack and has reached a depth of 650 feet, showing commercialized ores.

The process of recovery at the Banner mine will deviate slightly from the usual practice of amalgamation. Passing from the batteries the pulps will pass into two 10-foot arrasters (eliminate the silver plate) from the arrasters to concentrating tables, where decided tests will be made possible for future recovery methods.

Alex E. Wilson is manager, Fred Dunn, engineer of construction and development.

MISS LENORE STEGER AND MILES COUGHLIN WED

Miss Lenore Steger and Miles D. Coughlin were united in marriage Saturday at high noon at the court house by Judge Raglan Tuttle. Members of their families and intimate friends were present for the ceremony.

The court house folks with whom both had been associated for some time suspicioned the wedding and as they came down the stairs from the court room they were greeted with all sorts of noise-making instruments and showers of rice.

A wedding luncheon was served at the home of the bride on Pine street, after which they departed on a honeymoon.

Both bride and groom are natives of Nevada City and have spent their entire lives here, attending and graduating from the schools of this city.

The bride, oldest daughter of Mr. and Mrs. Robert Steger, has been deputy county recorder for a number of years. The groom is the son of D. G. Coughlin. He entered the law office of Searls and Searls as a law clerk and stenographer. He was appointed court reporter by Judge George L. Jones upon the resignation of John O'Neill and retained by Judge Tuttle. Both are popular in Nevada City, where they have a wide circle of friends. They will reside in Nevada City.

SEDIMENTS OF MONTEREY BAY ARE ANALYZED

A careful study of the present sediment now being deposited in Monterey Bay is presented by E. Wayne Galliher. The work is a contribution to the fundamental study of the geologic processes involved in the deposition of sedimentary formations. This work should be of particular interest to petroleum geologists and others interested in non-metallic products, especially of the sand deposits in the state. The report is well illustrated with maps, charts and photographs.

LET'S HAVE BIGGER AND BETTER FOURTH

Let's all pull together, as we have in the past, for a bigger and better 4th of July for Nevada City and county.

The Nevada City miner's band that went to the annual Nevada county reunion picnic in Sacramento last Sunday carried banners announcing our celebration. This was a splendid way to spread the news and we may look for fully 10,000 people here for the big event.

The '49er celebration put on two years ago was considered one of the best events ever given in the northern part of the state.

Many are awaiting eagerly to learn of our plans and will come here from the hot Sacramento Valley and other sections of the state for this celebration, in this beautiful, cool and romantic spot.

Large Gold Brick Taken Out at Johannesburg

Gustav Bender sent out a gold brick of 118 ounces the result of the second cleanup on the cyaniding of the Operator Consolidated Mines' mill, Johannesburg. This gold is rated at $14 to the ounce.

Mr. Bender, in competing the plant looks for better results as he carries on.

CALIFORNIA INDUSTRIAL REVIEW OF WEEK

Sacramento — Contracts totaling $41,430 awarded recently for projects in southern California.

Righ-of-way being secured for construction of Burney-Fall River Mills highway for which $431,000 contract has been let.

Gerber—Work started at California alfalfa mill employing from 20 to 45 men.

Yuba City—Four carloads cherries shipped from Earl Fruit Co. packing house during recent day.

Weed—Oiling of Weed-Klamath highway progressing.

Oroville—Eqiupment for working 150 acres virgin placer ground near this city, being placed in position by E. I. West and associates.

Swingle—Bids asked for grading and paving 1.7 miles highway between this place and Yolo Causeway in Yolo county.

KELP-O VITA
for HEALTH, YOUTH and VIGOR

Men, women and children find KELP-O-VITA a safe and efficient treatment for debility, loss of vital powers and glandular impairment. YOU CAN BE OLD AT FORTY OR YOUNG AT SIXTY. QUIT DYING BEFORE YOUR TIME. KELP-O-VITA is a mineralized vegetable, easy and pleasant to take, not habit-forming. RICH in Vitamines and Organic Salts. KELP-O-VITA is a REVITALIZER, a REHABILITATOR, a REJUVINATOR, an INVIGORATOR and a RECONSTRUCTIVE. INCREASES VITALITY and gives PEP, VIM and VIGOR. KELP-O-VITA is for VITALITY, the last word in modern science, send this adv. with your name, address and 25c in stamps or coin for Address Kelp-O-Vita Laboratories, 1046 Venice Blvd., Los Angeles, Calif. Dept. A-48 one week's sample treatment.

GOLER CANYON PLACER

By Jo P. Carroll

Goler canyon. With the successful try-out of the large sluicing plant, several properties now under option will speedily come to a head.

Britton and Murphy before deciding the method of handling the placer material made many runs in a smaller plant with flattering results compared with the sampling that was done in shaft sinking, boring and in many other ways; when it came to the slogan, "LETS GO" a large gas shovel was brought in for the purpose of building a mountain road up the side of the high hill, on the south side of Sand canyon, where the mill plant was to be constructed.

A pipe line less than a mile in length connects the huge tanks on top of the hill, settling tanks well tarred on the inside are in place; for the present try-out the placer material will be trucked to the mill. Later on a tram will be installed, when so, the gold saver can be counted on as true to name.

In no way does the operations thus far advanced show any indications of being a promotion proposition. Dan Murphy being asked "is there any surety that the machine will be doing business next Sunday," he replied that "it'll be going all right" and a come-back, "why?" When answered that a little publicity would bring out a dandy Sunday crowd, then and there the quickest route down the canyon for the news gatherer was the workers trail.

All of which meant, that even on a quiet week day there is all ways a sufficiency crowding the workers.

Last week the large gold dredger in Benson gulch was hung up awaiting the arrival of Mr. Pierce, the builder, to make some repairs. In the mean time the three quarter shovel was building a large stack of gravel and dirt for the next runs.

C. C. Harris, well known northwestern business man, and president of the Josophine Mines Inc., with headquarters at Spokane, Washington, was shown over the Goler diggings by D. V. Cole of Los Angeles.

Pumping the waters, caused by last winter's storms, from two of the 60 foot shafts (bedrock) in Goler canyon proper, has been resumed with favorable showings.

Sinking of the shaft on the Fine Gold claim is progressing in good order. R. A. Watson and Los Angeles associates, in opening this ground, located at the mouth of Goler canyon, will soon prove the underground values of that section of the district.

D. V. Cole, the owner of choice ground in the canyon, has granted four leases, the lesses to start sinking shafts immediately. His holdings are much in demand. At an average of twenty five gold seekers a day call at his Los Angeles office, seeking information as to the desert placers.

Owing to the dampness of the ground surface, all of the old-time dry wash miners are getting by by finding pay dirt in many of the old shafts, and in some cases where they worked back in the 90s.

A cleanup of the Jack Evans lease, at the end of the day's work, brought into Randsburg, recently showed well in coarse gold, several small nuggets extracted before the wash proceeded, added to the looks and value in the California gold pan.

Placerville—New porch being installed on Placerville sanitorium.

Blub-b-b-b

KERN RIVER BASIN

By Jo P. Carroll

The Big Blue mine, now operated by the American Smelting and Refining Company under the supervision of Aerial Horrie, has completed the projectoed 150-foot winze, sinking from the 260-foot level, put in sump and is cross-cutting in a body of ore said to be 105 feet wide.

At present about 30 men are employed with an approximate payroll of $100 per week. It is given out that probably in July the number of workers will be greatly augmented.

The Escabara mine, on Greenhorn Mountain, one mile from Davis ranger station, is a new development and bids fair to be a profitable one.

A shaft has been sunk to a depth of 65 feet crosscutting from that point. Approximately 50 tons of free milling ore are now on the dump. It is said that the ore will average $30 per ton.

Mine buildings have been erected and a residence built with a view to permanency. Recent additions to mining equipment are: an air compressor, drills, stopper, concentrating table and a two stamp mill. The working are under the supervision of Mr. Frosh.

J. H. Copelin of Kernville, who is in possession of the St. Johns mine, located in the Sagebrush district, about 15 miles from Weldon, reports the probability of this property being reopened and thoroughly developed at no great future date. He states mining engineers representing a financial syndicate have made exhaustive tests of the St. John reporting favorably to their superiors.

Years ago this mine was one of the largest producers of gold ore in Kern county, California, available records verifying production from $3000 to $5000 per week over a period of years.

PERSONALS

Karl Kopp is erecting a large garage on his property on Nimrod street. It will be used by renters of his cabins.

Herbert M. Cooper, district manager of the P. G. & E. Co., of Auburn, was a business visitor in Nevada City Tuesday.

Coroner A. M. Holmes presided at the meeting of the Northern California Funeral directors association in Sonoma county, this week.

Mrs. Clayton Chatfield and brother, James King visited in Camptonville over Memorial Day.

GAME WARDENS AND FORESTERS COOPERATE

For a number of years there has been the closest spirit of cooperation existing between the state game wardens and the personnel of the national forests of California. Particularly in the matter of fire prevention and suppression have the game wardens worked whole heartedly with the rangers, and the rangers have reciprocated for this service by aiding in the enforcement of fish and game laws.

The cooperation between these two agencies has not stopped at these important activities, for the federal officials have aided materially in the conservation and protection of wild life, and in the stocking of streams and lakes in the national forests with game fish.

S. B. Show, regional forester of this district, reports to the state fish and game commission that during 1931 there were planted in the waters of the forests 3,785,237 trout, in which forest rangers assisted.

Heaviest planting was done in the Lassen forests, 1,016,890 fish being freed; Tahoe forest, 610,940; San Bernardino forest, 572,970; Plumas, 321,000; Sequoia, 260,000; Santa Barbara, 257,990; Modoc, 242,000. These fish were furnished by state hatcheries.

The rangers checked hunting and fishing licenses and furnished the state commission with reports. These show 121,876 hunters visited the national forests during the 1931 deer season.

The experienced knowledge of the government officers in fishing conditions has been of invaluable aid to the Fish and Game commission in guiding them in matters having to do with the closing and opening of streams and lakes to fishermen.

CALIFORNIA PAPERS WHICH HAVE USED THE LINER SERVICE

The following progressive newspapers in California have recently used the Liner Circulation Service and the "Weekly Payroll" plan with satisfaction to all concerned:

CLOGGED VENT HOLE BLOCKS FLOW OF FUEL

Care should be taken to see that the small vent hole in the gasoline tank cap does not become clogged, suggests the Free Emergency Road Service of the California State Automobile Association. When the vent becomes closed, thereby causing air stoppage, a vacuum is formed which prevents the flow of fuel from the tank to the motor.

---0---

RADIATOR LEAK NEEDS CARE OF SPECIALIST

Repairs to a leaky radiator should be done by a radiator specialist, advises the Free Emergency Road Service of the California State Automobile Association. Various supposed remedies of a temporary nature, such as the use of corn meal or bran, should be avoided.

ELECTRIC RANGES ARE IN FASHION PARADE

Fashion parades this year are not confined to wearing apparel. Home furnishings are coming in for their share of attention too, and material, color, and design play just as important a part in equipping the kitchen as they do in the wardrobe.

The modern woman likes to express her personality in her surroundings and as a consequence her kitchen has blossomed into a gay, cheerful, attractive workshop in which the daily tasks can go forward with the least effort and the most enjoyment. With her mechanical aides, the modern woman commands more service than her grandmother could with half a dozen human servants.

Chief among the modern homemaker's helpers is her electric range. Manufacturers have given their first consideration to developing its efficiency and operating economy, and their efforts have resulted in ranges that offer every conceivable cooking convenience, including accurate operation in the absence of the cook.

After perfecting the mechanical details, manufacturers turned their attention to beauty of design and finish and as a result today's electric range is as symmetrical in line as any other piece of good furniture, and as colorful and easy to clean as fine china. New models are offered in an infinite variety of color, to harmonize with any scheme of kitchen decoration.

★ MORE THAN 210,000 CALIFORNIA WOMEN SAY *"The Cleanliness of Electric Cooking will keep your new kitchen* NEW!"

These Newlyweds figured it out this way

..Electric Cooking will be just as up-to-date 5 or 10 years from now as it is today

Young people who are happily establishing households this month of the June Bride, plan ahead. They want to be in step with the times—now and forever. That is why an automatic electric range is the logical choice of modern brides.

Kitchens colorful with bright newness stay new for years because of the clean heat of electric cooking. Modern electric ranges, too, have style and beauty in their gleaming porcelain finish offered this year in a wider range of colors than ever before. And every part of these superior electric ranges is rustproofed, better built—truly an investment modern now—modern ten years or more from now.

In operation electric ranges offer outstanding superioritics for household cooking. They are quiet, clean, cooly efficient, for all the heat of surface coils or oven units is concentrated on the one job of cooking food. And an electric range makes a good cook, The Perfect Cook—because Time and Temperature Control assures time-after-time uniformity in cooking results.

New homes, new households by the thousands each year are having electric ranges installed. It is the trend of these modern times—to cook electrically.

See the beautiful electric ranges on display in our office or your electric dealer's store. They cost no more than any other range of like quality and NOW a Special Offer is in effect which includes exceptionally easy terms.

BANKAMERICA HAS A HOME FINANCE PLAN

Stimulation of California's entire building industry and increased employment in the building and allied trades was predicted as the result of the announced action of Bank of America in extending its credit policy to favor loans for the construction of small homes. This, it was explained, is Bank of America's way of translating words into action.

The Bank's plan to encourage the return of sound prosperity to all of California was presentel last week by Will F. Morrish, president, in the Bank's "Back to Good Times" radio program over stations KGO and KFI of the National Broadcasting company.

"We in Bank of America are bending every effort to keep our eyes on the road ahead," Morrish said in revealing the Bank's home loan plan. "We are devoting our full energy to a program founded upon a sturdy faith in California and an unfaltering conviction that there is a new and sounder prosperity ahead.

"We are now making loans to aid people in the construction and ownership of small homes and thus to take advantage of the lowest building costs in twenty years. The making of these new loans will make it possible for many people in moderate circumstances to now build the home of their dreams; to plant gardens and flowers and to watch their children play on their own green lawns.

"These loans may be repaid in instalments over a period of years. As these funds are loaned, the entire building industry with its tens of thousands of workers, will be helped and stimulated."

Morrish devoted some time to discussion of "signs of returing confidence." He declared that Bank of America's own experience in increased deposits and the return of idle money to the bank is proof of a more determined attitude on the part of the people.

"This increase of our deposits, I know, is good news of better times which will be received with interest by hundreds of thousands of our people, as this statewide bank serves one out of every four Californians through its system of 410 branches in 243 different communities," he continued.

"The nation's authorities give a full measure of credit to this and other branch banking systems for California's financial stability during these trying times. This bank has been tried and tested and today is enjoying the benefit of its established policies and practices. These authorities look upon our state as the financial "white spot" of the nation. They predict that branch banking, as pioneered in California, will become the established banking practice in every section of our land. Financial leaders now see that this branch banking system gives American finance the opportunity to avoid the unfortunate experiences of the past two years."

Here then is a way to put that idle lot or lots in Nevada City to work. The Bank of America has the financing plan, our local lumber yard has the building plans and local carpenters, plumbers, painters, electricians are willing to pitch in and help make the vacant lot that you have into a profitable investment to you.

—0—

YUBA RIVER COUNTRY

A portion of the Swiss Alps lying within seven hours automobile journey of San Francisco, four hours from Sacramento, or two and one half hours from Grass Valley-Nevada City; such is that section of the canyon of the North Yuba river in the bottom of which lies Sierra City, at the very foot of the SierraButtes whose mammoth creviced rock peaks rise to a height of nearly one perpendicular mile above the town. As the scenic highway sweeps up the canyon, with the always predominating Sierra Buttes towering above, one cannot help looking for a Swiss chalet at every turn. Unquestionably Sierra City has one of the most breath taking locations of any city or hamlet in North America.

It was in the spring of 1850 that P. A. Haven and Joseph Zumwalt came over the divide—the first white man to locate where Sierra City now stands. At that time the canyon was well filled with Indians. The same year a Mr. Murphy located the Sierra Buttes quartz ledge. By 1852 many tunnels pierced the Sierra Buttes mountain in every direction, and about twenty arrastras, run by mules, were pulverizing rock in the neighborhood. There was a Catholic church, baker shop, several gambling houses and saloons.

During the winter of '52 the heavy snow fall and snow slides coming down the mountain sides demolished every building and killed two men. It was not until '58 the permanent town was started. In 1871, Wells Fargo Express started its lines to Sierra City with Mr. Bush as their agent. He put up a three story brick building on Main Street that year, started during the Fourth of July celebration. J. J. Tinney read the Declaration of Independence to a vast audience and Frank Anderson of Downieville, delivered an eloquent and thrilling oration. The ceremony was conducted by the E. Clampus Vitus society. The brazen serpent of this ancient and honorable association was displayed to the public gaze, while Harry Warner in an "able preoration dilated at some length on the benefits accruing to its members and their families by this connection with a secret order possessing such broad and liberal principals." I tis said that many an old "Clamper" was fired with enthusiasm and dozens of applications were receiyed for membership. E. Clampus Vitus, known as the E. C. V., or the Clampers, was organized in Sierra City in '57, with Samuel Hartley as pioneer N. G. H. (Noble Grand Humbug). No traveling man or drummer could transact business in the mining camps unless he had joined the "Clampers". so practically everyone of them did.

A traveling circus once reached Sierra City and the first night but a few women and children witnessed the performance. Knowing he could always expect a full house when playing in the distant mountain camps, the curious circus owner was at loss to explain the lack of an audience. Inqiuring around he found he was not patronized because he was not a Clamper. He applied for membership and was boisterously initiated the following night. The initiation was so enthusiastically administered that when it was over his temper was irreparably lost and he shouted, "I have traveled all over the face of the globe and to think I had to come to this tailend of creation to be taken in!"

The Busch building still stands with the various names over its doorways. And "E. C. V." still marks the door through which the Clampers were wont to pass. This ancient and honorable society is again being revived by some members of the California History Society and others interested in 49'er lore. On May 29th an initiatory meeting of E. Clampus Vitus Redivivus was held in the Meek Mercantile Store at Camptonville, presided over by Adam Moore, 85, the last N. G. H. of Balsam Lodge, No. 170,304 of Sierra City and Brother William Bull Meek as recording secretary. Carl I. Wheat was elected N. G. H. of the new chapter. Sierra City of today will be the subject of next week's bulletin.

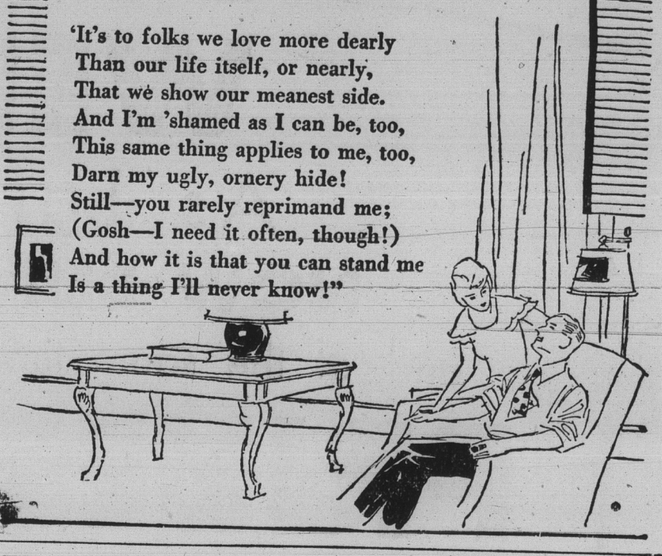
You and I

By CHARLES S. KINNISON

ALL-FORGIVING

"Sure I love you, and you know it,
Though sometimes I hardly show it,
When I'm feelin' tired and blue.
So, believe me, Honey Darlin',
Tho, sometimes you find me snarlin',
And my meanness breakin' through,
'Tain't that I don't love you, Honey;
It is just my cussedness.
Yes, I know I'm kinda funny,
But I love you, none the less.

'It's to folks we love more dearly
Than our life itself, or nearly,
That we show our meanest side.
And I'm 'shamed as I can be, too,
This same thing applies to me, too,
Darn my ugly, ornery hide!
Still—you rarely reprimand me;
(Gosh—I need it often, though!)
And how it is that you can stand me
Is a thing I'll never know!"



The Busiest Person in Town

CAMPTONVILLE NEWS NOTES

Camptonville, June 14.—Although dampened by one of the heaviset rains of the winter, the meeting for the revival of the E. Clampus Vitus came off very successfully here Saturday evening. Three automobile loads of brother Clampers from San Francisco, led by Adam Moore, 85 year old veteran of the order, arrived Saturday evening and were welcomed by Bill Meek, pioneer member of the society of this place.

The following day it was planned that they go up the old ridge road to Forest, Mountain House, and Nigger Tent, cross over to Goodyears Bar, Downieville and Sierra City, but due to heavy rain this road was impassable. They went by highway to Sierra City where they had lunch at Sierra Buttes Tavern, returning to Downieville where they were welcomed, and returned to this place for dinner at Hotel Francis. In the evening, the sound of the Hewgag from the porch of the Meek store called the wayfard Clampers together and the first meeting was held, with election of officers, each member holding an office and all officers of equal indignity. A candidate was worked on during the routine of the evenings work, and the meeting terminated with a number of stories, by Bill Meek, the best known story teller in northern California.

While on the journey during the day they picked up several relics which at one time belonged to the active order. At Sierra City, Adam Moore, found his old plug hat which he wore 35 years ago, and in as good condition as it ever was, and the Sword of Mercy, an implement of huge proportions, with the Clampers Gun, a delicate fire arm, over seven feet long, weighing 75 pounds. An original hewgag, once owned by Clampers at Marysville, now belonging to Mrs. Tapley of the Hug City was loaned to the present bunch of Clampers for this occasion.

Had the weather been fair a much more spirited and attended meeting would have taken place, but wet as it was, a very good start has been made in the revival of this noted society, and it is presumed that more will be heard of them later on.

The Bell System's Greatest Asset

"Although not appearing on the balance sheet, the greatest asset of the Bell System is the skill, energy and character of the hundreds of thousands of men and women who make up its organization, who have during the past year rendered a more efficient service than ever before."

—From President Walter S. Gifford's statement to stockholders of the American Telephone and Telegraph Company, in his annual report for 1930.

"MINING IN CALIFORNIA"

The state mineralogist, Walter W. Bradley ,announces that "Mining in California," January, 1932, is now being distributed. It contains the following articles on economic mineral deposits, building stone, geological processes in sedimentation and a new mineral discovery, as well as various items of interest and reports of progress. Copies may be had at 25c postpaid at the offices of the State Division of Mines in San Francisco, Los Angeles, Sacramento and Redding.

"Weekly Payroll"

CAMPAIGN Officially Opens

MON., JUNE 20th

Subscriptions may be taken any time following this announcement.

Competition is open to men and women, marr of the more ambitious sort residing in this ci costs nothing to try, and as all participants a every effort expended, you positively cannot carefully—every word of it—then clip the co for yourself or a friend. Remember, a good

The Plan Is New - The Work Is E

"Weekly Payroll"
COPYRIGHT

PLAN IN BRIEF

The object of this big "Weekly Payroll" Drive is two-fold. Primarily, to increase the already large subscription list of this newspaper; to collect arrearages and advance subscription payments from present or old subscribers, and at the same time to afford the live-wire, energetic men and women, boys and girls, of this territory an opportunity to profit in a BIG way through their spare time during the next few weeks. So, it is a plan that works both ways, and to the ultimate good of all concerned.

In order to gain this end quickly and advantageously, the most attractive awards ever offered by any newspaper in this section have been made ready for distribution among those who participate most actively. Ambition and energy are the only requisites for success.

Let it be understood at the very outset that this is not a "beauty" nor "popularity" contest, but a strictly legitimate competitive proposition for enterprising men and women, and one into which no element of chance enters. Each active participant will receive a pay check every Saturday night. One feature of this drive is the fact that "Everybody Wins." There will be no losers.

HOW TO ENTER—WHAT TO DO

The first thing to do is to clip the Entry Coupon appearing below; fill in your name and address and mail or deliver to this newspaper at once. This coupon entitles you, or the person whom you might wish to enter, to 5,000 free credits. These credits are given as a starter to speed you on your way to win. Only one such Entry Coupon will be accepted for each participant.

The next step is to call or write the "Weekly Payroll" Department for a free working outfit. Thus equipped, you have but to see your friends and acquaintances and have them subscribe to this newspaper through you. That's all there is to it! However, you will never get anywhere unless you make the start—the earlier the better. Once started, let no one discourage you. Anything worth having is worth striving for. Six and a half short weeks and you may be riding in your own BIG automobile or otherwise several hundred dollars richer in purse.

HOW CREDITS ARE SECURED

It takes credits to win, and they are secured in the following ways: First by clipping the Free Credit Coupons appearing in each issue of this newspaper. There is no limit to the number of these coupons you may secure. Get your friends to save them for you. They all count. Begin gathering them NOW while they are good for 100 credits each. After next week these coupons will be reduced to 50 credits each. The following week to 10 credits, and after that they will be discontinued entirely. The only restriction placed on these coupons is that they must be cast before the expiration date.

The other, and much faster way to accumulate credits in this "Weekly Payroll" Drive is by securing new and renewal subscriptions to this newspaper. On each order secured credits are issued, the number varying according to the amount paid and during which "period" same are received at the "Weekly Payroll" Department of this newspaper. (See schedule of credits below.)

EARLY START MEANS EASY FINISH

The advantages of an early start are manifest. This "Weekly Payroll" drive is of such short duration that immediate action is necessary for success. Orders taken during the early part of the campaign carry the MAXIMUM number of credits. Then, too, the first in the field will undoubtedly get the "cream" of credits and subscriptions, while those who put off entering until a later date will have to take what is left.

Don't lose valuable time "waiting to see what the other fellow is going to do," but pitch right in and show the "other fellow" how to do it!

ADVISORY BOARD—

It is the sincere aim of this newspaper to conduct this campaign from start to finish in a fair, honorable and impartial manner. Every precaution has been taken to safeguard the interests of participants, and absolute honesty in all dealing is guaranteed.

However, not all wisdom lies with any one man or institution, and for that reason an Advisory Board has been decided upon, whose functions shall be to decide any question of sufficient moment that might happen to arise, and from which a committee shall be selected to act as judges and award the prizes.

The personnel of this board is as follows:

ARTHUR W. HOGE, W. F. GRIFFITH,

EDWARD C. UREN, M. ANGIOLINI.

All of these gentlemen are well known to everyone in this vicinity and the final results, as given out by them, will be beyond dispute.

Second Award

TRIP TO HOLLYWOOD and the Olympic Games

You have always wanted to see "movies" and "talkies" in the making. Here is your chance, and at the same time you can take in the World Famous 1932 Olympic Games.

The Winner of this Award may have his or her choice of the trip or the equivalent in cash.

Modern Oilburning Ocean Liners
Built especially for this service

If you would rather take a real vacation, instead of the Plymouth Car, how does this sound? A Transcontinental Tropical Cruise De Luxe via the Famous Panama Canal to New York, touching eight foreign ports enroute with 28 days at sea, thence back to Nevada City.

Shouldthe Winner of the first major award not choose to take any of the options mentioned as first award, the cash equivale nt of the above trip will be given.

"Weekly Payroll" RULES AND REGULATIONS

1. This campaign is open to all reputable men, women, boys and girls residing in this city or surrounding territory—except salaried employees of this newspaper [illegible]. This newspaper reserves the right to reject any entry.

2. All participants will be paid a ten per cent commission on their subscription collections each week. ACTIVE participants, who do not win a major award, will receive an additional ten per cent at the close of the campaign, making a total of twenty per cent ($1.00 out of every $5.00) guaranteed active non-prize winners.

3. It is distinctly understood, however, that in the event any participant becomes INACTIVE, failing to make a regular cash report, he or she will, at the discretion of the management, become disqualified and forfeit all rights to extra commissions or an award.

4. The winners of the awards will be decided by their earned credits, said credits being represented by ballots issued on cash collections and coupons clipped from this newspaper.

5. Participants in this campaign are not confined to their own town or community in which to secure subscriptions, but may take orders anywhere.

6. Credits are free. It costs the subscriber nothing extra to cast credits for a favorite participant. Credits must be asked for at the time of paying subscriptions, otherwise subscribers waive this privilege.

7. Credits are not transferable. Participants cannot withdraw in favor of another participant. Should a participant withdraw from the race, his or her credits will be cancelled. Neither will it be permissible for participants to give or transfer subscriptions to another participant.

8. Twenty-five thousand credits will be given each participant for every 5-year subscription or its equivalent turned in during their first week of the campaign.

9. Five Thousand extra credits will be given to each participant who makes a cash report each Tuesday, Thursday and Saturday nights.

10. All credits issued on ballots may be held in reserve and cast at the discretion of participants or this newspaper. The free credit coupons appearing from time to time in the paper must be cast before the expiration date.

11. In event of a tie for any one of the awards, a prize identical in value will be given each tying participant.

12. Participants in this campaign are authorized agents of this newspaper. It is understood and agreed that they will be responsible for all money collected and will remit such amounts in full on regular report days to the "Weekly Payroll" Department.

13. Any collusion on the part of participants to nullify competition, or any other combination formed to the detriment of "Weekly Payroll" participants or this newspaper will not be tolerated. Any participant taking part in such combination will forfeit all right to a prize or commission.

14. To insure absolute fairness in the awarding of prizes, the race will be brought to a close with a sealed ballot box. During the entire last "period" of the campaign a ballot box—locked and sealed—will repose in the vaults of a local bank, where participants and their friends may deposit their final collections and reserve credits. In this way, no one—not even the Campaign Manager—can possibly know the actual strength of the various participants, which precludes any possibility of favoritism and insures fairness to the minutest degree.

15. No statement or promise, oral or written, made by any representative or participant varying from these rules or statements appearing in the columns of this newspaper will be recognized by the publisher or the campaign manager.

16. In case of typographical, or other error, it is understood that neither the publisher nor "Weekly Payroll" manager shall be held responsible except to make the necessary correction upon discovery of same.

17. This newspaper guarantees fair and impartial treatment to all participants, but should any question arise, the decision of the management will be absolute and final.

18. In becoming a member of this "Weekly Payroll" Campaign participants agree to abide by the above conditions.

How to Get Votes---Official Vote Schedule of THE NEVADA CITY NUGGET

FIRST PERIOD
Ending Saturday night July 16.
The following votes will be given:

1 year	$ 2.00	3,000
2 years	4.00	8,000
3 years	6.00	12,000
4 years	8.00	18,000
5 years	10.00	25.000
6 years	12.00	40,000

SECOND PERIOD
Ending Saturday night July 30.
The following votes will be given:

1 year	$ 2.00	2,000
2 years	4.00	6,000
3 years	6.00	10,000
4 years	8.00	15,000
5 years	10.00	20,000
6 years	12.00	35,000

THIRD PERIOD
Ending Saturday night, Aug. 6,
The following votes will be given:

1 year	$ 2.00	1,500
2 years	4.00	4,000
3 years	6.00	7,500
4 years	8.00	11,000
5 years	10.00	15,000
6 years	12.00	30,000

The above schedule of credits, which is on declined scale, positively will not be changed during the campaign. However, a special ballot, good for 50,000 EXTRA votes will be issued on every "club" of $20 turned in. This arrangement will be in effect throughout the entire drive, and is to be considered a part of the regular schedule. This newspaper reserves the right, if so desired to include job printing and advertising, in which event the above schedule of credits will obtain and in the same ratio of increase for larger orders up to a limited amount. No subscriptions will be accepted for less than one year, nor more than six years in advance from any one participant.

DOUBLE VOTES WILL BE ALLOWED ON ALL NEW SUBSCRIPTIONS DURING THE FIRST AND SECOND PERIODS!

Extensions of subscriptions will receive votes according to the vote schedule in effect when the first subscription was paid, except that no extensions will be given in the last period.

"WEEKLY PAYROLL" WORKERS

Fifth "Weekly Payroll" Winner

Sixth "Weekly Payroll" Winner

In addition to regular "Weekly Payroll" checks, winner of sixth place will receive extra "bonus" check for 15% of his or her total earnings added.

EXTRA CASH AWARDS

There will be awards at the close of each of the First and Second Periods. The following amounts of CASH to the candidates tunring in the greatest amount of money: $20.00 to the first; $10.00 to the second, and $5.00 to the third. These awards are extra to all others.

YOU ARE INVITED TO PARTICIPATE IN THIS CAMPAIGN
IT COSTS NOTHING TO TRY!
Fill Out the Coupons on this and the Front Page Now, TODAY, and enter!
LET'S GO!

Weekly Bonus Awards Count Big

Each Saturday night that a candidate reports, a BIG BONUS BALLOT will be issued, based on the work done by that candidate during the current week, based on the following schedule:

FIRST PERIOD

$ 50.00	reported for the week	150,000 Votes
$ 75.00	reported for the week	300,000 Votes
$100.00	reported for the week	600,000 Votes
$150.00	reported for the week	1,000,000 Votes

SECOND PERIOD

$ 50.00	reported for the week	100,000 Votes
$ 75.00	reported for the week	200,000 Votes
$100.00	reported for the week	300,000 Votes
$150.00	reported for the week	600,000 Votes
$200.00	reported for the week	1,000,000 Votes

ENGINEER COMMENTS ON THE PROSPECTS OF AUBURN SECTION

In the interest of the Mine Owners Association of Auburn, Calif., G. E. Lukens, president of the organization, personally interviewed Frank L. Buchanan, who has a national reputation as being the greatest practical mining expert of the present day, and invited him to visit Auburn and the surrounding mineral belt and give the people of Placer County and elsewhere expert advice on ores and mineral formation.

"I had heard so much about this well-known expert," said Mr. Lukens, "that he had 50 years' practical experience in mining, quarrying and milling all kinds of rock and ore to his credit, that he had credentials no other mining man could show, many testimonials and other data giving proof of his skill and had openly challenged any living man to equal his ability to trace veins, locate deposits, install and direct proper methods to separate ores and save the values, cut the expense of the prevailing methods of mining to less than one-half and open up low-grade properties and make them pay that I felt confident he could tell us what was needed to open up our mines and put them on a paying basis, bringing great wealth to the people of Auburn and making this city a great mining center."

On Mr. Buchanan's arrival in Auburn Mr. Lukens took him around the district where mining is going along in a crude way, they visited mines where plans are being installed. Mr. Buchanan said most of the ore in this camp is low-grade and there are unlimited amounts, most mining is being done on the surface, only a few have gone down to sulphides where the large bodies of paying ores are, that in his examination of the numerous mines and prospects he was agreeably surprised as he did not expect to find such general and undeniable evidence of vast mineral depostis as was in evidence hereabout, what was needed was the push-energy of the experienced miner backed up by a little capital, enabling him to treat ores and save values. Years ago and under the old methods of milling ores it required big capital, now we have new machinery and methods that mill and save more values at a cost of 3c not over 25c per ton to mill 40 to 100 mesh and make concentrates; to mill up to 100 to 300 mesh would cost 5c not over 50c per ton for metallic and non-metallic ores, now very low-grade ores pay, the main cost is mining and getting it to the bin or hopper.

Mr. Buchanan knows the best and cheapest methods of saving gold and other ore values, also the best class of rock and ore machinery; he has seen and operated many kinds of rock and ore reducers and found them very expensive; he knew they were not made for all kinds of ores, they were only profit-makers on high-grade ore and high-grade ore is getting scarce; low-grade ore deposits always pay the biggest profits because the production is steady and continuous. Machinery that is speedy, giving large capacity and low operating cost was needsd, the machinery is now on the market and prices are within reach of all who want to install them on any and all kinds of ore, clay, etc., which Auburn is surrounded with. This activity will benefit all business people and provide employment for day workers, bringing back prosperity greater than it ever was. Enough ore and valuable minerals are exposed now to justify these claims and there are practical signs to show an unlimited tonnage for centuries to come to keep mining and milling in operation. Skillful mining is profitable, less money is lost recovering values from Mother Earth, proportionately than in any business or any investment on earth, according to mining experts. Able mineral production makes governments, cities, banks, railroads, corporation and all forms of business secure. What the investing public wants to know is, will the property or mine pay to work it and what will it cost to put same in shape for maketing the ore and then will there be enough payore in sight for the erection of a mill, using proper machinery to mill ores at a good profit, and, last but not least, is there a capable man in charge who understands who constitutes a day's work and knows how to separate ores and save the values at a low price and curtail other expenses.

Several years ago Mr. Buchanan visited Auburn and discovered this city was especially well situated for a custom milling plant, sampling works, concentrating plant and other mineral industries that would put Auburn on the map as a mining and industrial city where all trains, busses and other transportation systems will stop for business and observation. He asserts that the inducement now is even greater as the machinery is available to reduce any and all kinds of rock and ore in any amounts, and for the least possible cost. The Auburn mining district, when opened up, is destined to produce unlimited tonnage of gold bearing ore and be headquarters for mine operators of the Gold Belt, there are no richer fields, according to size of territory, or greater assuance of gratifying rewards for earnest and intelligent participation in the development of Auburn's natural resources of wealth, according to many mining experts.

A real gold mining boom is on in earnest in all mineral districts where gold is in evidence; early-day miners left their marks which also help greatly. Gold in the Auburn district is prevalent; recovery is no game of chance if best guaranteed methods of milling and saving the gold and other values are used; there need be no "Doubting Thomas" now. Auburn is well on the way to economic recovery and influence. All credit is due the Mine Owners Association, which is being widely recognized and everyone in the district is eager to assist in the movement to make the "wheels of progress hum with activity," bringing the greatest prosperity known to Auburn and Placer County.

0

YUBA RIVER COUNTRY

Sierra City, with the Sierra Buttes towering a mile above, lies near the northern boundary of the Yuba River canyon country. In the winter its population is small but in summer it is filled with vacationists and fishermen from all over California and Nevada.

The Sierra Buttes Inn, operated by Ernie Innes, master of the local lodge of Masons and trout fisherman supreme, each summer is the headquarters for many people, many of whom have been spending a month or two there year after year. With Ernie it makes no difference whether he wants a trout from one of the many lakes or from the North Folk of the Yuba river or its tributaries, he simply walks along and pulls them out at will. Needless to say he is the envy of all who come to the mountains and see him fish.

The two garages in town are both unique in that their compressors for the air which fills tires are run with water wheels. Many people have their own electric light plants also run by water wheels. That is one of the refreshing things about Sierra City—the profusion of cold sparkling mountain water that comes tumbling down the mountains on all sides. The Hotel Garage is run by Sircy, a man whose gigantic will keeps a crippled body functioning. Sircy"s best friend is Felix. Felix consists of a half pint of fox terrier and chow. The master's slightest word or sign is immediately and implicitly obeyed. He picks up coins, cigarettes, anything. In fact, last summer Felix picked up over ten dollars of coins at the hotel and immediately brought them over to Sircy. And he loves to play with rubber balls. He digs into pockets, drawers, waste paper baskets—anything to get a ball. The other day Felix was a little bit slow and did not respond with his usual alertness, but Sircy explained it all, "Felix has a woman now."

Due to the abundant supply of water coming in on every side and the foresight of old timers who put in fire plugs years ago, plus the efficacy of another one of the old two-wheel fire carts that came around the Horn to protect San Francisco in the early '50s, later being purchased by Sierra City, no fire of major proportions has ever visited the town, in this Sierra City is unique among California's early towns. The fire tower stands in the middle of the city ready at all times to call the volunteers. Many of the business houses and mining structures built during the early days are still standing. The Busch building—lower half brick and upper half wood—the Sierra Buttes mine mill and boarding house. And alongside the inn is an old thoroughbraced wagon that many years ago used to be a stage—and then a Chinaman's' vegetable wagon.

Len Thompson has a garage built over the side of the mountain that slopes away from the highway to the river; Ben Hames, who is a supervisor of Sierra County, and his wife run the grocery store and telephone exchange. A little further up the street Miss Aba Cox is the postmistress and one of the few women hardware dealers in the state. All of the people of Sierra City are real mountaineers. You can't' live in the high Sierras, year after year with tremendous canyons on one side and immense mountains on the other without building into your character a friendliness and stapleness rarely equalled anywhere. That is why time spent in the mountains is not enjoyable only from the standpoint of climate and scenery. Perhaps the greatest single contribution towards a happy sojourn in the high hills is because of the friends one finds there.

In the fresh, cool mornings the sun's ray first light up the mammoth rocky peaks of the Buttes. As you watch, they turn from a dull dark shadow to a flash of fire. Almost perceptable the glowing sunlight climbs down the mountain and into the canyon. It is a wonderful experience to wake up early in the morning at Sierra City.

Nevada City High School Band

This wonderful musical organization gives weekly concerts from the balcony of the National Hotel on Wednesday evenings. It is an organizations which any city could well be proud of and the concerts given are well worth attending.

PREDATORY ANIMALS KILL DEER IN NATIONAL FORESTS

Predatory animals killed more deer in the eighteen national forests of California than were killed by deer hunters during 1931. Figures furnished by the forest service to the state fish and game commission give the number of deer killed by mountain lions, coyotes and bob cats as 24,420. Those killed by hunters in the national forests of this state were placed at 18,721.

Deer legally slain during the 1931 season throughout the state totalled 25,805.

Trinity forest reported the heaviest kill by beasts of prey, the forest supervisor estimating the number at 6,120. Shasta forest came second with 3,200 deer killed; California forest, 2,500 and Klamath forest, 2,465. These forests all in northern California, contain the bulk of the mountain lion population, numbering some 1,656.

Forest rangers report 30 antelope killed by carniverous animals in the Modoc forest during the year just ending.

There were killed in the national forests of the state or adjacent to them, 6,765 coyotes, 2,032 bob cats and 216 mountain lions.

The report further indicates there were 245 bears killed in the national forests, as a protective measure for farmers and cattle growers. Trinity leads with 55; Klamath and Shasta forests with 46 each; California, 27; Stanislaus, 21 and Sierra, 20.

There are now said to be 8,482 bears roaming the higher ranges, under protection of the California fish and game commission.

NEWS IN BRIEF

Academy To Give Operetta— On June 11th Mt. St. Mary's academy of Grass Valley, conducted by the Sisters of Mercy, will hold its annual commencement exercises. After the graduation program an Irish operetta, "The Lady of the Terrence", will be presented by students. Assisting will be a large chorus from the student body.

Herman and George Hein, nephews of the late Mrs. C. J. Brand arrived to attend her funeral Tuesday.

Mrs. E .R. McMath and daughter, Mrs. Ed Trimmer and husband and son, motored up from San Francisco last Saturday to visit relatives. Mr. Trimmer and Mrs. McMath returned home Sunday afternoon and Mrs. Trimmer and son will remain for a vacation. Mrs. McMath is a sister of Mrs. Chas. Guenther, Mrs. Rogers and Mrs. Will Jeffrey of Nevada City.

Facts About the Telephone

Liberia has no interior lines of communication, such as telephones or the telegraph. Messages are sent from town to town by runners or by boat.

A new direct telephone circuit has been placed in service between the cities of Des Moines and Cedar Rapids. It is the seventh circuit now in service between these two cities.

On January 1, 1931, the Bell Telephone Company of Pennsylvania owned and operated 1,283,315 telephones. This is an increase of 64,813 over the number in service on January 1, 1930.

For a number of years the American Telephone and Telegraph Company has had the largest stock list of any corporation in the world. The stockholders are located in every state of the Union, and in seventy foreign countries and United States possessions.

In the news of the death of Mrs. Amelia Brand of Nevada City pangs of sorrow came to every heart. She was beloved by every one and her well known kindness and charities made everyone her friend. Deepest sympathy is extended to her daughter and other relatives.

THE MATTRESS OF THE YEAR
1932
$19.32
Karr No. 176X . . . Inner-spring Construction
It has class, beauty, comfort—of the sort that lasts and lasts. We could, by all the usual standards, sell it for around forty dollars. It's that good!
Inside of this mattress is a retempered all-steel Karr spring construction with baked japan finish. Permanently locked coils alternate in right and left direction so as to always maintain an even, non-sagging surface. Any mattress man will tell you that this type of spring unit is the last word in quality. YOU NEVER FIND THE KARR INNER-SPRING IN A CHEAP MATTRESS.
Shop if you will . . . but don't expect to find the equal of "Nineteen Thirty-two" for less money. We assure you that both ourselves and the maker have gone to the very limit in offering this mattress at $19.32. The approval of the Master Bedding Makers of America is, like our endorsement, your guarantee of absolute satisfaction.

RANDSBURG MINE NEWS

By JO. P. CARROLL

On the eve of completing the large reduction plant and the starting of active production from both the Baltic mine and the white mine in the Randsburg district, C. E. Adair, local manager, received a wire that the Hollywood band where their available funds were on deposit had closed. Mr. Adair immediately departed for Los Angeles to meet with the principals of the company for the immediate resumption of their plans.

William Towne, leasor of the Black Hawk mill, has had a tedious time in making repairs on the pipe line to the mill from the Yellow Aster water system. Owing to the long, cold winter weather, Bill founl many leakages in the long-unused pipe line, that has caused two weeks setback in his starting the mill.

The first run of ore will be on the Fillipi and Dezan lease product, some 50 tons. This set of leasers in stoping, will soon have a second milling. Duran and McKenzize, the second set of Black Hawk leasers, are in hopes of finding better milling ore with depth.

The third set of leasers north of the mill have good indications of bringing in a bunch of high-grade. The fourth lease is looking good, both in gold and tungsten; one bunch of the latter, 50 pounds, extracted shows a commercial high grade that will readily sell in Los Angeles at two dollars a unit over the market quotations.

The Windy mill is making a 50-ton run of gold ore from the Frank Feldman lease on the Pinmore mine, Johannesburg.

Leasers Blaylock and Reynolds are due for a sweet milling in the near future on a good grade of free milling gold rock, extracted from the Minnehaha mine west of Randsburg territory.

The Black Hawk mine, a long time ago one of the good gold producing mines of Inyo county, is to be reopened by S. K. Johnson of Kansas City, and associates. Some time has been spent in making an examination and mill tests of the latter, some 15 tons were milled and the clean-up brought $200 gold values and $1.79 silver, with a loss of $9 in the tailings. Preparations are now being made for a 25 ton plant and tram.

It is estimated that the Black Eagle has more than 10,000 tons of mill ore that will average $11 per ton. A two stamp mill now operates on the property; heretofore all ores have been packed to the mill by mules.

The Johnson interests are operating the property under a lease from George H. Lewis and A. T. Smith, well known residents of Inyo county.

A new discovery on the surface, showing 33 inches in width, assay average of $54.17 in gold, will be developed immediately.

A little more interest given to the Goler district placers by the business houses of the Rand, would result in the knowledge of a gold bearing field that is being brought in by heavy and improved gold savers. In less than one year, the publicity given to these diggings has and is attracting the attention of mining capital to the vast acreage of gold bearing gravel.

Owners of ground that cannot or will not do any prospecting or opening up their claims, will be wise to get in touch with men that do understand how to make a little dry wash machine pay better than beans and make the royalty easy, they will open up the ground, and if favorable, your chances to sell follows very quickly. Don't be a paperhanger.

A pull-together, business houses and claim owners, would soon see active operations in all of the canyons and diggings that supported hundreds and hundreds during the 93-4-5 dull times, prior to the discovery of Randsburg and the California Rand mining district. Let's do!

Report comes in that Weller and Leichman have struck bedrock on their lease of the Smith, Dawson and Company, section 26 north of Johannesburg, at a depth of 60 feet. It is said that they have eight feet of pay dirt at the bottom.

The present operators of the Big Gold are in the market for a mill that will handle their gold ore production.

Two inquiries for information as to cinnabar showings in the county of Kern have been received. The parties were told about the Keene plant, the Maginnis and Day property at Randsburg and the Payne prospect in Pine Tree canyon.

A mining engineer connected with the staff of the Corporation Commissioners office, was a last week visitor to the Silico company's property in the Last Chance district.

FRENCH CORRAL

Hail to our Flag! Yes, we know it is Flag Day, but with this showery weather we can not keep Old Glory waving.

Wonder why it is we always have rain when harvesting is going on? We have had all kinds of weather for the past week.

The Cherry Carnival festivities in San Juan were well attended and a financial success from what we hear, but was a cherry carnival minus the cherries. As San Juan cherries once had a state-wide reputation, this advertising, if they have none is misleading and displeasing to some people. The basball game between Browns Valley and North San Juan was quite an interesting game, with the former winner, score 8 to 7.

Prospecting and "long Tom" mining still continues in this section.

The graduation exercises of the Nevada City high school were attended by many from the San Juan ridges.

We were pleased to know that one of our French Corral pupils, Miss Barbara McMinn, won highest honors and was entitled to the Hauber Scholarship. As this was given from the University of Californit and it would be impossible for her to attend the university at Berkeley, the scholarship was passed on to the next highest, Miss Betty Bettles. We are very proud of the good work of the San Juan ridge pupils and particularly those from French Corral and are most happy to give mention to their splendid efforts. Miss Barbara McMinn was a general favorite with all. She, with the other members of her family, left French Corral Monday to make their home in Los Angeles. The departure of this family from our community is much regretted as they were beloved by all.

The members of Columbia Parlor No. 70, Hill G. W., held a meeting Friday afternoon. After large business was concluded a program for Flag Day and also commemorative of Washington Bi-centennial was presented.

Thos. F. Fogarty of Marysville was a Sunday visitor. He was accompanied by Mr. Williams and Byron Jaynes, who wished to visit this beautiful section.

Mr. and Mrs. E. B. Dudley of North Bloomfield were the guests of Mr. and Mrs. W. E. Moulton Sunday.

Miss Frances Moulton of Sacramento spent the week-end with her parents in French Corral.

Mr. and Mrs. Lloyd Dudley of Nevada City spent Sunday with the family of Mr. and Mrs. W. E. Moulton.

Mrs. W. Higgins returned to her home in Los Angeles Monday. She accompanied the Sutherland family.

It was with deep regret we learned of the death of Peter Purcell of Los Angeles. In his youth he visited this place many times, as he was related to two pioneer families of Birchville, the Maroney and Fogarty families. His father, Peter Purcell, was also a pioneer of Birchville.

OLD LAWS PUNISHED INCENDIARIES SEVERELY

That the forest incendiary is not a new menace to public welfare is proved by a law promulgated 250 years ago in Pennsylvania. In 1676 the Duke of York, brother of King Charles II of England, made the penalty for kindling a fire in the woods and permitting it to escape to cultivated land, the payment of all the damages plus one-half more as a fine. If the guilty person could not pay he was liable to receive "not excxeeding twenty stripes"—in other words, be publicly whipped.

In 1683, following the grant of Pennsylvania to William Penn, the next oldest forest protection law was passed. Whosoever set on fire woods or marshes was required to make good all the damage.

Miners Band Plays at Picnic—

The big Twin City auto stage bus left for Sacramento Sunday morning carrying the Nevada City Miners' Band to play at Nevada County reunion. The funds for the trip were supplied by the Fourth of July committee and the reunion association. Banners on the sides of the bus advertised the celebration of the 4th in Nevada City. The band played in several towns enroute to the reunion.

—0—

Mrs. Will Davis and sister-in-law of Sacramento, came up last weekend to spend the summer at the Davis property, Hide Away Park, in Willow Valley district.

District Attorney and Mrs. W. E. Wright have had as recent guests, Mr. and Mrs. James Carpender, their daughter, Miss Evelyn, and little grandson, Donald Marriott, of Oakland.

LEGAL NOTICE.

State of California
Department of Public Works
DIVISION OF WATER RESOURCES
Sacramento

NOTICE OF APPLICATION TO APPROPRIATE WATER

Applications 7024 & 7113

NOTICE IS HEREBY GIVEN, That EDWARD BICKEL, P. O. Box 881, Nevada City, California has applied to the Division of Water Resources, Department of Public Works, State of California, for permits to appropriate unappropriated water, subject to existing rights.

Description of Project
Application 7024

Date Filed: July 31, 1931.
Water to be Appropriated from: Greenhorn Creek, tributary to Bear River.
County of: Nevada
Amount applied for: 38 cubic foot per second
Diversion season named: January 1st to December 31st of each season
Water to be used for: Mining and Domestic purposes
Point of Diversion within: NE¼ of NW¼ of Sec. 10, T. 16 N., R. 10 E., M. D. B. & M.
Place of Use described: Sailor Flat Mine of Fenton Gold Mining Corp., within Sections 4, 5 & 8, T. 16 N., R. 10 E., M. D. B. & M., as shown on map filed with the Division of Water Resources.
Water will be returned to: Greenhorn Creek within NW¼ of NE¼ of Sec. 8, T. 16 N., R. 10 E., M. D. B. & M.

Application 7113

Date Filed: November 2, 1931
Water to be appropriated from: Little Greenhorn Creek (sometimes called Spanish Ravine) tributary to Greenhorn Creek, thence Bear River.
County of: Nevada
Amount applied for: 15 cubic feet per second
Diversion season named: January 1st to December 31st of each season
Water to be used for: Mining & domestic purposes
Point of Diversion within: NW¼ of NE¼ of Sec. 4, T. 16 N., R. 10 E., M. D. B. & M.
Place of use described: Sailor Flat Mine of Fenton Gold Mining Corp., within Sections 4, 5 & 8, T. 16 N., R. 10 E., M. D. B. & M., as shown on map filed with the Division of Water Resources.
Water will be returned to: Greenhorn Creek within NW¼ of NE¼ of Sec. 8, T. 16 N., R. 10 E., M. D. B. & M.

Relative to Protests

Blanks upon which to submit protests will be supplied free upon request by the Division of Water Resources.

Any person desiring to protest against the granting of such permits shall within 60 days from date hereof, file with the Division of Water Recourses, Sacramento, California. a written protest. Such protest shall clearly set forth the protestant's objections to the granting of the applications and shall contain the following information:

(1) Statement of the injury which would result to protestant from such appropriation and use.
(2) The basis of protestant's water right.
(3) Protestant's past and present use of water both as to amount used and land irrigated, or use made of water if other than irrigation.
(4) The approximate location of such land or place of use and of the point of diversion of the water.

A COPY OF THE PROTEST SHOULD BE SENT TO THE APPLICANT AND THIS OFFICE NOTIFIED THAT THE SAME HAS BEEN DONE.

EDWARD HYATT,
State Engineer.

DATED: Sacramento, California
May 19, 1932.
First Publication June 10, 1932.
Last Publication, July 1, 1932.

NEWS IN BRIEF

City Counccilman Home—

City Councilman Wade Armstong, who has spent several weeks in the Woodland clinic, where he was operated upon for stomach disorders, is home. It is expected his recovery will be rapid.

Messrs. Frank Walters and Carter Butts of San Francisco, engineers for Seagrave fire apparatus, were called to Grass Valley to overhaul the fire truck there. They spent Wednesday night at the home of the former's uncle, James Dolan, in Nevada City.

Another band concert by the high school band was greatly enjoyed Wednesday evening by a good sizzed crowd. The band plays from the balcony of the National Hotel.

Marshall W. Giselman was a recent visitor in San Francisco.

Mr. and Mrs. L. L. Meyers of Alleghany spent last Sunday in Nevada City.

Mr. and Mrs. W. V. Tamblyn have as guests Mrs. E. R. Huntley and little daughter of Loyalton.

Miss Minnie Brand is home from several days spent in Sacramento. Her niece, Miss Betty Gaylord, will spend the summer here with her.

Mr. and Mrs. A. M. Holmes and little daughter attended the graduation exercises of the Sacramento high school last week. Miss Christy Jane Holmes was among the graduates.

Herbert Cooper, divisional manager of the P. G. & E. Co., at Auburn, was a Nevada City visitor Friday. He attended the big Elks' meeting Friday evening, he being a member for many years.

George and Andrew Carey came down from their claim on Mt. Oro this week. They took out some fine looking coarse gold while doing their assessment work this year. Their prospects never looker better. These boys have done their assessment work for so many years so faithfully that their many friends wish them success in developing a big mine.

Miss Helen Arbogast of the Blue Tent section started working in the Nevada Cit yphone office Monday. She will be relief operator while different girls are on their vacations.

Mr. and Mrs. D. White, mine promoters of Seattle, Wash., are in Nevada City for a time.

Fred M. Miller, mining engineer of Grass Valley, attended to business affairs in Nevada City Monday afternoon.

Miss Eleanor Willoughby was among the class of graduates from the Nevada City grammar school last Friday.

Mrs. Ott Entertains—

Mrs. E. J. N. Ott entertained 36 friends from Nevada City and Grass Valley last Saturday at Mah Jongg and auctoin bridge. Mrs. A. H. Mooser and Mrs. E. M. Roesner of Grass Valley and Mrs. Otto Schiffner and Mrs. H. Curnow of Nevada City made high scores. Mrs. Parsons and Mrs. C. Grenfell of Grass Valley carried highest scores at Mah Jongg. Two former Nevada Citians present were Mrs. Carrol Searls of New York and Mrs. E. Baker, recently of South America. Mrs. Emil J. Ott, Jr., of Sacramento was present also.

Pretty spring flowers added much to the attractiveness of the pretty home.

Mr. and Mrs. Will Hatch and children attended the cherry carnival at North San Juan Sunday.

Narrow Escape of Downieville Men—

Frank Hansen and his partner, who are working the Golden Bear mine near Downieville, run into an old shaft while working in the bottom of the mine 180 feet below the surface. They were unaware of the old shaft being there and the sudden rush of water carried them like corks almost to the surface. Mr. Hansen required the services of a doctor to attend to his minor injuries, while his partner was uninjured.

Assemblyman Seawell Looks After Varied Interests

Assemblyman Jerry Seawell, who was placed on a number of committees last year, among them being the fish and game investigating committee, is seeking to have a small-mouth black bass rearing pond established on the Purdy ranch near Roseville. The rearing pond would be under the supervision of the California Associated Sportsmen. From from this pond would be used to stock the American river.

Mr. Seawell, who is now candidate for the office of senator, has created quite a name for himself in his efforts to assist the different communities he represents. His courageous fight against great odds to benefit the mining industry has won him strong support from this district.

THOUSANDS SEARCH FOR GOLD

"It always happens in depressed times that there is a revival of gold mining. When huge strikes are made this generally spells the end of the depression as witness the discovery of gold in this state in '48."—John D. Van Becker, financial editor of the Call-Bulletin, May 19, 1932.

DEER DIALS OUT CROONERS

A big buck that dislikes radio crooners is a story vouched for by the U. S. forest rangers of the northwest national forests. The buck will stand with his front feet on the porch of a dwelling and listen intently to radio music. He points his ears forward on the high notes and lays them back on the lower ones. When the crooners hit the falsetto at the end of a mammy song he turns away in apparent disgust and disappears in the tall timber.

Miss Esther Tremaine is in Berkeley where she will attend summer session at the university.

Mrs. Hugh Murchie has as a visitor Miss B. Peterson of Fresno.

Miss Mary Schmidt of San Francisco is in Nevada City with her parents, Mr. and Mrs. E. Schmidt, over the summer vacation.

Miss Helen Arbogast is visiting relatives in the bay cities.

Judge George L. Jones was a recent visitor in San Francisco.

Principal H. E. Kjorlie, of the Nevada City high school, went to Palo Alto where he will attend Stanford University summer session.

Stump Blown Through Roof—

Last Saturday a crew of men clearing a section of the Grass Valley-Colfax road, blasted a large stump that had stood near a school house for years. The stump went through the roof of the unoccupied building and stood upright in the room.

Nevada City is taking on the aspect of a large city with its used car lot down in the burnt district.

Mr. and Mrs. Robert Ewing motored to Orland Wednesday and returned Thursday, after a visit with her niece, Mrs. George Moore. Mrs. Ed. Marine accompanied them as far as Maxwell, where she visited with relatives and friends.

Born to Dr. and Mrs. V. V. Rood of Grass Valley, June 10, a daughter.

E. J. Rickard, who is in the employ of the forest service at Goodyears Bar, visited in Nevada City last week end.

Miss Thelma Davey was a recent visitor in Marysville.

NUGGET, AFTER CAREFUL SURVEY, LAUNCHES DRIVE

For the past few months the advisability of a subscription campaign for the Nugget has been carefully studied and after this consideration we have decided upon the enterprise.

From the various companies specializing in this work the Liner Circulation Service was finally chosen. Their representative comes to Nevada City with an excellent record both in point of accomplishment and complete satisfaction with which he has left every community where he has been active in this work. If the recommendations received from other publishers served by the Liner Circulation Service in this section of the world, are a criterion, then the campaign in Nevada City is sure to meet with success and general satisfaction.

The primary purpose of this campaign is to enlarge the usefulness of the Nugget and make it even more valuable as a medium for the promotion of the community's business and social well being.

It is also the belief of the management that this is a time for business to undertake new enterprises. Nothing can be accomplished by idly waiting for the return of better times. It is up to every institution, large or small, to undertake new ways and means of stimulating activity.

GOLD PRODUCTIO IN EAST

The mines in the eastern states yielded metals in 1931 valued as follows: Gold, $23,827; silver, $18,545; copper, $2,124,486; lead, $590,076; and zinc, $15,422,112. There were decreases in both the quantity and the value of all five metals, but the decrease in the quantity of lead and of zinc were proportionately much less than they were in other domestic regions. The producing mines reporting in 1931 were 10 placers and 17 lode mines.
